To whom it may concern,

Ecologic Homes Ltd

Mike and his company completed two major projects at our home in Mapperley Park in Nottingham: the first an attic conversion and the second an extension that replaced a 'lean to', outbuildings and a garage at the back of the house. Mike was the architect and project manager throughout and organised all aspects of both builds from scratch, from the plans and planning permission through to sign off and dealing with building control.

Both projects were very successful and we were very pleased with the results of both projects. The build and project management was of the highest quality. Any snagging was dealt with effectively and the attic conversion and extension have added greatly to the house.

I would and indeed have recommended Ecologic Homes to other people and would continue to do so.

Mark Cheesman
